

## PROTECT YOUR ROADS WITH MEGAFLO GREEN 200

### MEGAFLO® GREEN 200 SOCKED AGI PIPE

#### COMPARED TO 100mm ROUND AGI PIPE

Up to  
**1.6x\***  
faster water  
drainage

Saves up to  
**50%**  
installation costs

Made in Australia  
with recycled material

Subsurface drainage and water removal is critical in maintaining structural integrity and reducing deterioration in road construction. MegaFlo Green 200 provides the dimensional stability and field-proven structural strength for quick, effective subsurface drainage making it an ideal solution during heavy rainfall periods.

MegaFlo Green 200 rapidly collects and removes water with its slim 40mm wide profile, permitting a more cost-effective installation in a narrower trench. Compared to Class 1000/SN20 round agi pipe, MegaFlo Green 200 drains water up to 1.6 times faster.

#### BENEFITS OF MEGAFLO GREEN

- Compared to round pipe, saves costs by up to 30%; up to 35% in delivery; and up to 50% in installation
- Easy storage and handling with delivery on pallets which improves on-site safety and reduces storage space
- Complies with VicRoads Pavement Drain specifications and approved for use by road authorities

\* Results may vary with different round pipe and ground conditions on site

Sustainable solutions

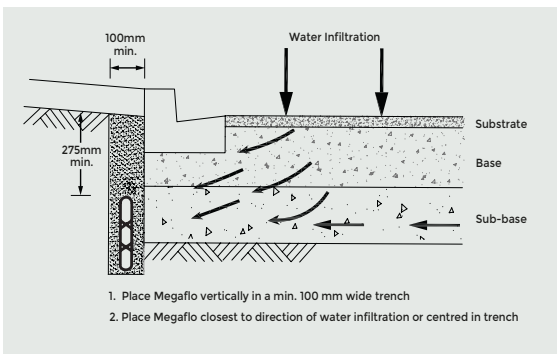

## BENEFITS OF MEGAFLO GREEN

- High compressive modulus and structural rigidity prevents deflection under normal service loads
- Superior stiffness improves both vertical and horizontal alignment, reducing turbidity which can lead to excess sediment buildup and reduced flow rates
- Unique design removes and drains water rapidly, making it an ideal solution for road edge drainage and retaining walls
- Range of connection fittings available from Geofabrics

## MEGAFLO GREEN 200 SPECIFICATIONS

Code	Width	Height	Length
<b>MEG200G</b>	40mm	200mm	50m

Code	Description
<b>Outlet Fittings</b>	
<b>MF200CO</b>	Coupling
<b>MF200EO</b>	End Outlet
<b>MF200SO</b>	Side Outlet

## SUSTAINABILITY WITH MEGAFLO GREEN

Megaflo Green 200 is made in Australia from recycled HDPE milk bottles, meeting the Victorian Government's Local Content and Recycled First policies.
